

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## PREFATORY NOTE.

---

THE following translation of BRAMBACH'S admirable *Hülfsbüchlein für lateinische Rechtschreibung* will, I trust, prove of practical value to classical students in this country. To those whose aim it is to become accurate Latinists, the importance of the subject can scarcely be overstated. It has been held, indeed, by not a few scholars of sober judgment, that it is a matter of even greater moment than the question of Latin pronunciation; but, not to touch upon that vexed point, it would, perhaps, be truer to say that until Latin orthography is systematically and persistently taught in our schools and colleges, no reformation in pronunciation is likely to obtain generally.

The significance of the subject from a metrical and etymological point of view is too manifest to require argument.

And yet it is scarcely too much to say that the whole matter is practically ignored in this country,

both in the actual teaching of the class-room and, with few praiseworthy exceptions, in American editions of the classics. In the former, as a general rule, one form of a word is accepted in written exercises as being quite as good as another; while in the latter, outside a few scholarly editions, we find a dead level of orthographic uniformity from Sallust to Tacitus.

That such a state of things can long exist in a country where there are so many teachers trained in the best European universities and fully abreast of the results of Continental investigation, is not to be expected. England, the most conservative of nations in things classical, as in all other things, has responded with unwonted promptness to the eloquent pleadings of PROF. MUNRO on the subject in his Introduction to Lucretius, and English schoolmasters, it is said, are doing conscientious work in this direction. In Germany the subject has long been accorded in the schools that degree of painstaking attention which it so fully merits, every boy in the gymnasia being required to keep constantly at his elbow such a ready-reference table of orthography as that appended to this volume. Of the eminent scholars who, in that country, have made the matter a subject of special investigation, FLECKEISEN, WAGNER, SCHULTZ, and

others, BRAMBACH stands confessedly first, his larger work published in 1868 (*Die Neugestaltung der lateinischen Orthographie in ihrem Verhältniss zur Schule*) having made him the generally recognized authority on the subject. In this *Hülfbüchlein* the student will find embodied the results of that more elaborate work as well as those of the author's subsequent study, and it is to be hoped, in the interests of sound scholarship, that the book will be as cordially welcomed by teachers in America as it has been by their brethren in Germany.

Immediately on the appearance of the *Hülfbüchlein*, in 1872, the eminent classical publishers, Messrs. Teubner of Leipzig, advertised that thereafter the texts of their Latin authors for schools would be printed in accordance with its decisions. These well-known texts ("für den Schulgebrauch") are used in many of our best schools and colleges, and afford valuable aid to teachers who bestow any attention upon Latin orthography. Necessarily dictionaries and grammars exert an overwhelming influence in this direction, and it is a hopeful sign that we have recently had an elementary Latin text-book (the excellent *Latin Primer* by PROF. B. L. GILDERSLEEVE, PH. D.) in which BRAMBACH's spelling has been consistently followed, and that the revised edition of ANDREWS' *Latin Lexi-*

*con* has been intrusted to scholars who are known to be in sympathy with the great German authority.

My special obligations are due to my friend, PROF. THOS. R. PRICE, M. A., one of the foremost of our young American scholars, not only for assistance in verification of authorities cited, but for repeated and valuable suggestions.

A few errors in the German original have been corrected in this translation, and the table of abbreviations extended.

The references to Vol. II. of NEUE'S *Formenlehre der lateinischen Sprache* have also been changed so as to conform to the new edition of that valuable work, which has entirely superseded among scholars the old edition referred to in the original.

## INTRODUCTION TO THE GERMAN EDITION.

---

RULES for Latin orthography have a double aim.

In the first place, they seek to give the texts of authors the proper form that is based upon the history of the language.

In the second place, they settle the forms for modern Latinity.

### I.

The time in which the Roman writers now read in our schools flourished, embraces a period of about two centuries (something more than from 100 B. C.\* to 100 A. D.). At the beginning of this period, the Latin language, as is frequently evidenced by the texts of these authors, was in process of a rapid development in respect to forms. With a view to distinguish the usage of these writers in the matter of pronunciation and orthography, we may divide them into three groups.

To the first and oldest group belong Cicero, Cæsar, and Sallust.

Of these, Sallust has a marked fondness for long-

\* This limit is given in view of the fact that Terence is, unfortunately, no longer read in German schools.

established forms, while Cæsar lends a ready ear to the pronunciation just coming into fashion, and in so far as his philological studies allow it to seem advisable, forwards a general acceptance of the same through his writing. Cicero takes a middle course, by seeking not so much to carry through his own peculiar notions about the correct system of phonetic spelling, as by accepting the actually received usage in regard to pronunciation and orthography, and by making concessions to it contrary to his own convictions.

Livy, Vergil, Horace, and Ovid constitute a second group.

Livy is no innovator in the matter of spelling and pronunciation. In his simple narrative he clings to the prevailing orthography of his contemporaries. But as his whole heart is with the past, he has the knack, when treating of grave and venerable matters of religion and state, of giving an antique coloring to his narrative by using words aptly selected, whether we regard the words in themselves or their archaic spelling. The same is true of Vergil.

On the other hand, Horace and Ovid, gladly turning to the fresh life of the present, prefer to avail themselves of the modes of speech just coming into vogue. Horace, indeed, puts himself into a conscious antagonism to the old-fashioned poetry of the past.

To the third group belong Quintilian, Curtius, and Tacitus.

These wrote in a time when the innovations which had forced their way in since Cæsar's day had attained general recognition, and were used in writing without hesitation.

Apart from the others stand Cornelius Nepos and Phædrus, whose writings have been handed down to us in such a way as to render impossible any authoritative judgment as to the original state of their texts. We can only remove from these texts incorrect readings, without introducing into them the peculiar orthography of any fixed time.

On the other hand, the texts of the other authors named above may be so dealt with, that the first two groups conform to the practice of the old Latin in pronunciation and spelling, which prevailed down to the time of Nero, while the third (Quintilian, Curtius, and Tacitus) belongs to the Silver Latinity in its highest development.

Moreover, we are not to suppose that ancient authors undertook any critical revision of their manuscripts with an eye to orthography. So far as we can form an opinion from the originals, the ancients did not hesitate to use side by side, in the same passage, and without distinction, both of the correct forms of a word, provided that these forms still held a place in the living speech.

A narrow selection of certain forms, the spelling and pronunciation of which were to be rigidly observed throughout, would, in the eyes of an author, have seemed a task fit only for some obscure literary

drudge. But, on the other hand, they were equally far from employing recklessly current and antiquated forms side by side.

The bad taste of the second century after Christ first introduced this vicious habit.

## II.

The orthography which obtained in the Silver age, when at its highest form-development (from Nero to Hadrian), may be justly regarded as the best model both for modern Latinity and for grammatical purposes. For, in the first place, our Latin forms have been, in point of fact, based upon this orthography by the older grammarians. The later grammarians too, in part unconsciously, have nearly all taken this stage of the development of the language as their starting-point. To think of setting up now any other period as the standard, would be a useless experiment, and, in comparison with the insignificance of the object, one involving far too much trouble. In the second place, we know of no earlier period of the Latin tongue so precise in the matter of forms as that which begins with Nero, while it evidently would not be advisable to select for our purpose any later time. In the third place, the form of the language from Nero to Hadrian really exhibits its fullest phonetic development.

In presenting the essential general rules for Latin orthography, we have in the following pages taken as our basis the model period of the language. Side by side, we have also given those deviations of the

older period which should be familiar to the pupil for his reading.

The greater part of this hand-book consists of an index of words, in which we have arranged, in alphabetical order, the rules of orthography which are of most importance in schools, for written exercises, and for the reading of authors. In preparing this index, regard has been had as much as possible to practical needs. We have especially omitted, so far as feasible, all references to larger grammatical works, since it is not seldom the case that the teacher has no means of verifying such references. On the other hand, pertinent citations from authors used in schools are given. By thus referring the reader to sources easy of access, we afford him the opportunity of prosecuting his own orthographic investigations, and of keeping them vividly in his mind.

## GENERAL RULES OF ORTHOGRAPHY.

---

### A. SPELLING.

#### § 1. THE NATURE OF LATIN SPELLING.

THE spelling of the Romans was phonetic (according to sound); that is, the sounds uttered in actual pronunciation were indicated by the spelling. If single sounds were varied or lost, the spelling changed in conformity with such variation, while lost sounds were no longer indicated.

Etymological spelling is opposed to phonetic spelling. Etymological spelling arises when those sounds which were originally present in a word are still written in full, after they have undergone change, or are only faintly heard in the living pronunciation. Of this last kind is the French spelling.

#### § 2. THE LATIN ALPHABET.

From the time of Augustus, the Romans used the following alphabet:

A B C D E F G H I K L M N O P Q R S T V X Y Z.

The two letters I and V marked a vowel as well as a consonant sound, viz. *i* and *j*, *u* and soft *w*. The character *J* for *i* (*pronounced like y*) is modern. But even in antiquity, side by side with the angularly shaped *V*, there came into use a rounded secondary form *U*, employed in writings on papyrus or parchment, in painted as well as in *sunk* inscriptions, and, more rarely, in *raised* ones. This

secondary form likewise marked a vowel as well as a consonant sound.

The letters Y and Z belong to foreign words, especially Greek ones.

The Latin alphabet is derived immediately from the Greek. Z stood in the sixth place, but it was scarcely used at all, and in the third century B. C. disappeared. Its place was taken by G, a letter which did not originally exist, and which took its shape from C. Towards the end of the Republic, the necessity of writing Greek words accurately led to the adoption of Y, and to the re-admission of Z. These letters consequently came in at the end of the alphabet.

In the modern forms of the Latin alphabet, I i and J j, U u and V v, are distinct. But as the character J did not come down to us from antiquity, it has, in more modern times, been generally removed from the texts of Latin authors. The smaller form *j* is also to be avoided in Latin. On the other hand, the use of *u* to mark a vowel sign, and *v* to mark a consonant sign, has become far more general. We adhere to the prevailing usage, and consequently in the following pages, I or *i* denotes the vowel *i* as well as the consonantal *j* (pronounced *y*). V designates the vowel *u* and soft *w*; *u* is only vowel, *v* only consonantal.

## B. RULES DEDUCIBLE FROM PHONETICS.

### § 3. THE CONCURRENCE OF TWO I'S.

In ancient times, II was written, (1) if two purely vowel *i*-sounds met together; (2) occasionally to mark a half vowel sound = *ij*; (3) if a consonantal *i* preceded a vowel *i* = *ji*.

I. Two purely vowel *i*-sounds come together:

- a. In the Genitive Singular of the Second Declension (§ 14, 2).
- b. In the Dative and Ablative Plural of the First Declension, and in the Nominative, Dative, and Ablative Plural of the Second Declension (§ 13, § 14, 3).
- c. In the Perfect Tense and in the derived forms, if a *v* falls out between two *i*-sounds . . . -ii = ivi (§ 19, II.).

2. A half vowel sound *ij* arises whenever *i* occurs between two vowels without forming a separate syllable, the *i* in this case being essentially a consonant. So in *Ajax* = *Ajāx*, a little of the vowel sound was heard, and it was pronounced *Aījāx*. The latter was also indicated in writing, though not regularly, by the double I : AIIAX. Examples of the same kind are AII0, GAIIVS, GRAIIVS, (*is*) EIIVS, MAIIA, MAIOR, PEIIOR, POMPEIIVS, TROIIA, VVLTEIIVS. Cicero is said to have written AIIAX, AII0, MAIIA.

But as this was not the general usage in spelling, *we adhere to the prevailing custom of the ancients, and write only ONE I* : Ajax, aio, Gaius, Graius, eius, Maia, maior, peior, Pompeius, Troia, Vulteius.

Instead of II, a lengthened I (I = *i longa*) was also sometimes used, a character which originally represented the vowel *i long by nature*. In regard to this, as also on the double I, cf. BR. pp. 23, 184–188. We also find in Ciceronian MSS. the customary spelling with a single I, e. g. eius, maior in *Vat. Verr.*, *De Re p.*, al. Cf. RIBBECK, *Prol. in Verg.* p. 426.

- 3. Consonantal *i* may stand before vowel *i* = *ji* in compounds of the verb *iacio*. Cf. § 20, II.

#### § 4. THE CONCURRENCE OF TWO V'S.

VV was written in antiquity, (1) if two vowel *u*-sounds came together; (2) if a vowel *u* followed a consonantal *v*

=vu; (3) if a vowel u preceded a consonantal v =uv. VV representing uu and vu was not in use before the time of Augustus, but the older combination VO =uo and vo, was employed instead.

Cicero wrote INGENVOS, SERVOS (*ingenuos, servos*) for the Nominative Singular.

During the second half of the first century A. D., the grammars adopted the later form VV, which had come into use since the time of Augustus.

We follow the grammars of this time and write :

aedituus	avus	vulgus	acuunt
exiguus	cervus	vulnus	metuunt
ingenuus	servus	vulpes	statuunt
perpetuus	vivus	vultur	tribuunt
mortuus	ovum	vultus	vivunt, etc.

VV representing uv (e. g. uva, iuvo, iuventus) is certainly older than vu, uu, and there is no question as to its employment in writing.

Cf. Br. 87-101 on the older combination VO, which is also found in the later days of the Empire, and on the development of VV (uu, vu, uv).

VV was sometimes avoided by the falling away of one of these characters, e. g. INGENVS = *ingenuus*, VIVS = *vivus*, IVENTVS = *iuventus*. (Br. 90 sq., 94.) Under this head belongs the familiar *dius* = *divus* (sub dio).

On *quu*, see § 6, II.

### § 5. DIPHTHONGS.

1. Of the Diphthongs, ae and oe are liable to be confounded with e. Cf. such words as *caelum*, *glaeba*, *obedio*.

As early as from the first century after Christ, ae was confounded

with *e* in inscriptions, and it is often difficult to arrive at the correct spelling, since the oldest MSS. are in this respect utterly untrustworthy and faulty. We can only decide for the *æ* or the *e* with absolute certainty when a doubtful word is authenticated by well-written inscriptions. The confounding of *œ* and *e* passed over from plebeian into mediæval Latin, and has had a deteriorating influence on MSS. As in the Middle Ages *æ* and *œ* were confounded with *e*, so the distinction even between *æ* and *œ* became obliterated (BR. 204–207).

2. The Romans rendered *ει* before a vowel, in Greek words, by *e* as well as *i*. They did not employ the diphthong *ei*. This rendering of *ει* by *e* is the older usage, and belongs to the times of Cicero and Augustus, but by the first century of the Empire *i*—*ει* occurs far oftener. We cannot lay down a general rule which will hold in the case of every word, but must be guided in individual instances by the readings of MSS. and by inscriptions. See in the alphabetical index, **Alexandrea**, **Antiochea**, **Areopagita**, **Areus pagus**, **Augeas**, **Dareus**, **Decelea**, **Heraclea**, **Pythagoreus**, **Seleucea**, **Thalia**.

Before consonants *ει* usually becomes *i*, e. g. in patronymics like *Atrides*. Cf. in index, **cheragra**, **Hilotae**, **idyllium**, **Polycletus**.

The older form with *e* was preserved in *Aeneas* (*Αἰενᾶς*); *i* became prevalent in *Academia* (*Ἀκαδήμεια*). On the other hand, in most words, particularly in adjectives in *ειος* and in names of towns in *εια*, the usage varied, so that Priscian was forced to allow *e* as well as *i*. For examples, see ZUMPT on *Cic. in Verr.* II, 2, 21, 51; MADVIG on *Cic. de Fin.* V, 19, 54; ELLENDT on *Cic. de Or.* I, 21, § 98 (I, p. 67 *sq.*); OSANN on *Cic. de Re p.* (pp. 466–468); FLECKEISEN, *Philologus*, IV, 335 *sq.*; RIBBECK, *Prol. in Verg.* pp. 415, 417 *sq.*; Cf. KELLER, *Jahrb. für Phil.* 103, p. 759.

## § 6. GUTTURAL CONSONANTS.

I. *C as a Sibilant.*

From the beginning of the Middle Ages, or, at the earliest, from the last century of the Roman empire, C before I with a following vowel was pronounced as a sibilant. About the same time, or a little earlier, T before I with a following vowel in like manner became a sibilant. For example, since *cia* and *tia* were pronounced alike (*zia*), *ci* and *ti* were confounded in writing, and thus great confusion occurred in the MSS. of the Middle Ages. The true spelling can only be ascertained from the oldest MSS., and from inscriptions.

As early as the third century, *ti* before a vowel was confounded with *ci* in the African dialects. See L. MÜLLER, *De re metr.* p. 262. In the rest of the Western nations, the confusion probably first occurred a century later (BR. 215-219).

Examples are: *condicio, contio, nuntio, otium, solacium*, etc. Here belongs the whole class of Adjectives in *-icius*, which were first written with a *t* (*-itius*) after the fall of the Roman empire.

II. *QV before V.*

QV preceding a *u*-sound does not occur in the time of the Roman republic. Cicero wrote QVOM, CVM, QVOI (*cui*), EQVOS (*equus*), and the like. But when VV = *vu* had been formed, QVV also came into use, and we therefore write, following the text-books of the Roman empire:

antiquus,	coquus,	loquuntur,
iniquus,	equus,	sequuntur, etc.

BR. 95, 229 *sq.* Cf. above, § 4. The Ciceronian MSS. still preserve numerous remains of the spelling QVOM, etc.

But before the combination QVV (*quu*) was made possible, in some instances two new combinations had already been formed from the older form QVO. Q passed over into C, and from the VO there arose, either through abrasion, simple V, or through loss of V, simple O.

Thus are to be explained the following forms :

**cum**, old *quom*, was not written *quum*.

**cotidie**, sharpened into **cottidie** (*quoto-die*) ; not to be written *quotidie*.

As *cum* arose from *quom*, so the termination *-cus* arose from *quos* in Substantives and Adjectives : e. g. *aecus*, instead of *aequus*, *cocus*, instead of *coquus*, from *aequos* and *coquos*. This termination, which we frequently meet with in MSS., is, it is true, theoretically correct, but was not accepted by the grammarians of the Empire. Consequently we avoid it. So too the verbal forms *secuntur*, *locuntur*, instead of *sequuntur*, *loquuntur*, from *sequontur*, *loquontur*. (Br. 232-237.)

## § 7. LABIAL CONSONANTS.

### I. *B* before *S* and *T*.

*B* before *S* and *T* was pronounced hard, and sounded like *P*. In many instances this hard sound is indicated by the spelling, and in place of the original *B*, we find the *P*, which had come to represent that sound.

On this point the grammars should lay down the following rules :

1. *B* is written before *S* in Substantives, whose Genitive ends in *-bis* ; e. g. *urbs*, not *urps* ; *plebs*, not *pleps*.
2. *B* is written before *S* and *T* in Prepositions ; *ab* (*abs*, *absque*), *ob*, *sub* ; e. g. *absorbeo*, *obses*, *obsto*, *obtineo*, *subsequor*, etc ; not *aps*, *opt*.

Only in *subter* and *supter* are both spellings allowed, but the first is the more correct.

3. P is written before S and T in the Conjugation of the Verb; e. g. *scribo*, *scripsi*, *scriptum*, not *scribsi*; *absorpsi*, *nupsi*, *nuptum*, etc.

In antiquity, these rules were not always observed. We frequently find in inscriptions such forms as *PLEPS*, *OPSIDIO*, *OPTINEO*, *SCRIBTVS*, etc. (BR. 241-248.)

## II. P between M and S, M and T.

When M and S or M and T collide, a *p*-sound is inserted after the M. There are physiological reasons for this. The P-sound arises on opening the lips closed for the *m*-sound, and renders easier the transition to S or T. Accordingly, in Verbs whose stem ends in M, a P is inserted before the terminations *si*, *tum*, etc., e. g. *demo*, *dempsi*, *demptum*; *emo*, *emptum*; *sumo*, *sumpsi*, *sumptum*, etc. This spelling obtains universally in the case of the Verb. On the other hand, the P was generally discarded by grammarians in the Substantive *hiems*.

BR. 248-250. *HIEMPS* is also supported by examples (*ib.* 249).

## § 8. DENTAL CONSONANTS.

The two Dental Consonants, D and T, often sounded so much alike at the end of a word that they could not be distinguished. Owing to this, confusion frequently arose between D and T in spelling. The following rules are to be observed as being generally applicable:

1. Verbal endings have T: e. g. *inquit*, *reliquit*, not *inquid*, etc.

2. Pronouns have D: e. g. *illud* (like *aliud*), and *quod*, *quid*, *id*, to distinguish them from the Verbs *quit*, *it*, and the general Numeral *quot*.

3. Prepositions have D (*ad*, *apud*), and Conjunctions, T (*at*, *aut*, *et*, *ut*). *Sed* is an exception to the last.

The Adverb *haud* has the secondary form *haut*, and sometimes *hau* before consonants.

BR. 251-254. The usage of the ancients deviates frequently from these rules. The first rule is the surest, although such forms as INQVID and the like occur. We meet more frequently the pronominal forms QVOT, QVIT, and QVOD (as a Numeral Adjective), and even QVODANNIS = *quotannis*. So the Preposition and Conjunction AT = *ad* and *at*, is often not distinguished; SET = *sed* is remarkably frequent both in old and in later Latin. APVT, ILLVT, ISTVT, etc., are furthermore found.

### § 9. LIQUID AND NASAL CONSONANTS.

#### I. *Doubling of the L.*

After a long vowel L is frequently sharpened. There consequently arises a fluctuation in spelling between L and LL. Compare, in the alphabetical index, the words: *querela*, *Messalla*, *Paullus*, *paulus*, *Pollio*, *mille*, *vilicus*.

BR. 257-263.

#### II. *M before Dental and Guttural Consonants.*

In compounds, M, regularly before Dental Consonants, frequently before Guttural, becomes N.

i. Before Dental: (idem) *eundem*, *corundem*; (quidam) *quendam*; (tam) *tantus*; (quam) *quantus*; *tantundem*, *identidem*.

2. Before Guttural: cf., in the alphabetical index, *cumque*, *quicumque*; *nunquam*, *numquam*; *quamquam*; *uterque*, *utrumque*, and the like.

BR. 263 - 266.

### III. *N* before *S*.

*N* sounded but feebly as a Nasal between *S* and a preceding long vowel. It was therefore often dropped in writing. On the other hand, it was sometimes written even in cases where the word-stem originally had no *N*. Cf., in the alphabetical index, the words: *formosus*, *vincesimus*, *semestris*.

BR. 266 - 272.

### § 10. THE SIBILANT *S*.

In the time of Cicero, Augustus, and the emperors immediately after Augustus, *S* was sharpened in certain words after a long vowel or a diphthong, and was accordingly often doubled in writing. Such words are *causa*, *CAVSSA*; *incuso*, *INCVSSO*; *casus*, *CASSVS*; *divisio*, *DIVISSIO*. The grammarians accepted only one *S* in these cases.

BR. 273 - 276. In the case of double *S* in the words *casus* and *divisio*, the first *S* may be traced back to a *D* in the stem: *CAD-SVS*, *DIVID-SIO*.

### § 11. *X* BEFORE *S*.

Since *X* ends with an *s*-sound, an *S* preceded by *X* was not very audible in pronunciation. Consequently *S* after *X* was frequently dropped in writing; e. g. *exto* = *exto*. On the contrary, the text-books in ancient times required that this *S* should be written after *X*. Cf., in the alphabetical index, *exsanguis* and the words given under it.

BR. 277-280. Theoretically, there is no objection to writing XS, for the *s*-sound in the simple X was often expressly indicated by an added S; e. g. SAXSVM = *saxum*.

### § 12. ASPIRATES.

#### I. *H* before *Vowels*.

Even in the time of the Republic, H before vowels at the beginning of most words sounded so faintly that it was not expressed in writing. In imperial times, this weakening of the aspiration gradually extended to many words.

The weakening of the H also took place in the interior of words. (Cf. in the alphabetical index, *aeneus*, *cohors*, *prehendo*, *vehemens*, and the words under H.)

BR. 283-287. In the later days of the Empire, we find great confusion as to aspirated and unaspirated syllables; e. g. ABEO = *habeo*, and HABEO = *abco* (*abire*).

#### II. *Aspirated Consonants*.

Up to the second half of the second century B. C., the Latin language had no aspirated consonants. Afterwards, P, C, T, and R were aspirated, and the resulting formations indicated by PH, CH, TH, and RI.

PH is confined almost entirely to foreign words: e. g. *Philippus*; but also *triumphus*.

P is sometimes aspirated by the Romans in Greek words, even where the Attic dialect has π. See *Bosphorus*, *tropaeum*.

CH and TH are written not only in foreign, but in genuine Latin words. (See in the index, *pulcher*, *Cethagus*, *Otho*; cf. *ancora*, *Cilo*, *coelea*, *corona*, *lacrima*, *Orcus*, *sepulcrum*, *tus*.)

RH is written in foreign words; e. g. *rhetor*, *Rhodus*, *Rhenus*.  
BR. 287 - 294. The spelling RH was not rigidly carried out in foreign words. See in the index **Regium**. (BR. 294.)

### C. RULES DEDUCIBLE FROM INFLECTION AND DERIVATION.

Only such rules are here grouped together as apply to the use of letters either singly or in combination. Suffixes proper do not belong here.

#### § 13. THE FIRST DECLENSION.

Words in *-ia* do not regularly contract *-iis* of the Dative and Ablative Plural into *-is*; accordingly, double I is to be written here; e. g. *tibii*, not *tibis*; (*via*) *vii*, not *vis*. Cf. § 3.

On the other hand, contraction occurs in the poets, and sometimes also in inscriptions and in prose MSS. NEUE, *Lat. Formenl.* I, 32.

#### § 14. THE SECOND DECLENSION.

1. In modern Latin, and in editing post-Augustan authors, the archaic endings *-vos*, *-vom*, *-uos*, *-uom*, *-quos*, and *-quom*, of the Nominative and Accusative Singular, are to be avoided. Cf. § 4.

2. Substantives in *-ius*, *-ium*, should have *-ii* in the Genitive Singular: e. g. *filius*, *filii*; *imperium*, *imperii*; *Fabius*, *Fabii*. Before the Augustan age, the Genitives of these Substantives ended in a single I.

In editing old texts we must be guided by the contemporary spelling of the particular author; yet in post-Augustan authors, the *-ii* is preferable in Common Nouns. Proper Nouns have clung tenaciously to the single *I*, but even in them *ii* appears in poetry and in inscriptions. (BR. 188–196; 328–330.) Adjectives in *-ius* even before the Augustan age had *-ii* in the Genitive.

If a vowel comes before the ending *-ius*, the contraction of the two *i*-sounds is usual, and is accepted by some of the ancient grammarians. We may, therefore, in this case, choose between two spellings :

- (a) According to the prevailing usage, a single *I*, e. g. *Gaius*, *Gai*, *Gaio*; *Pompeius*, *Pompei*, *Pompeio*.
- (b) According to the general rule laid down by the ancients, *II*, e. g. *Gaii*, *Pompeii*, etc.

The first spelling (*Gai*, *Pompei*) is better.

3. Words in *-ius*, *-ium*, have *-ii* and *-ia* in the Nominative Plural, and *-iis* in the Dative and Ablative Plural: e. g. *filius*, Plural *filii*, *filiis*; *studia*, *studiis*. But if a vowel precedes, the contraction of both *i*-sounds into single *I* is more usual; e. g. *hi Gaii*, and, better, *hi Gai*; *Gaiis*, and, better, *Gais*; so, *Pompeii*, *Pompei*; *Veii*, *Vei*. See these words in the alphabetical index.

*Deus* has in the Plural *dii*, *diis*, and *di*, *dis*.

BR. 196–198; 137–140. *Dei*, *deis* is archaic; *dii* and *diis* are the regular forms of the old text-books (e. g. Liv. III, 11, 6; 19, 10; V, 32, 9; 43, 7; 51, 3; 52, 17. *Cod. Veron.*). *Di*, *dis*, as secondary forms, are likewise proved by inscriptions. (Cf. also Liv. V, 41, 8; VI, 6, 6. *Cod. Veron.*)

### § 15. THE THIRD DECLENSION.

1. Nouns whose stems end in *p* and *b*, retain the stem sound unchanged in the Nominative Singular before the

case-ending (*s*) ; that is, *B* does not change into *P*, e. g. *trabs*, not *traps*. Cf. § 7, I.

2. Stems in *-ōr*, originally *-ōs*, have the Nominative Singular regularly in *-ōr*; e. g. *amor*, not the ante-classical form, *amos*; *labor*, *odor*, etc. *Honor* has frequently the secondary form *honor*.

NEUE, *Lat. Formenl.* I, 166-171. BR. 277.

3. Some of the *e*- or *i*-stems have double Nominative forms in *-es* and *-is*. The following Nominatives Singular are regular: *aedes* and *aedis*, *apes* and *apis*, *caedes*, *cautes*, *clades*, *fames*, *feles*, *fides* and *fidis* ("string of a musical instrument"), *labes*, *lues*, *moles*, *nubes*, *palumbes*, *proles*, *pubes*, *rupes*, *saepes*, *sedes*, *strues*, *suboles*, *tubes*, *vates*, *vehes*, *verres*, *vulpes*.

NEUE, *Lat. Formenl.* I, 179 sq., 182 sq., where irregular Nominatives in *-es* are given. BR. 147-149.

4. The following words have the Accusative Singular only in *-im*: *vis*, (*amussis*) *amussim*, *buris*, *cucumis*, *ravis*, *rumis*, *sitis*, *tussis*. So, the names of Italian rivers in *-is*, and Greek words in *is*, *iv*, have *-im* in the Accusative in Latin; e. g. *Tiberim*, *Lirim*, *Fubarim*, *basim*, *ibim*, *Amphipolim*, *Neapolim*, etc.

NEUE, *Lat. Formenl.* I, 198, 207-212. BR. 175-179. Names of rivers not in Italy have also the Accusative in *-im*, e. g. *Albin*, *Tamesim*, *Tigrim*, *Visurgim*.

5. The following have the Ablative Singular in *-i*:

- (a) Nouns, which have the Accusative in *-im*. (See above, 4.)
- (b) Neuters in *-e*; e. g. *mare*.
- (c) Neuters in *-al* and *-ar*; e. g. *tribunal*, *calcar*.
- (d) Adjectives in *-er* of three endings and in *-is*; Proper

Names, however, in *-is* (e. g. *Iuvenalis*) have *-e*, as *Iuvenale*, *Martiale*.

The following admit of the Ablative in *-e* or *-i*:

- (a) Adjectives in *-as*, as *Arpinas*, *Ravennas*.
- (b) Adjectives of one ending.

*Hospes*, *sospes*, *pauper*, *degener*, *uber* (Adjectives in *-er* without a Feminine form), have only *e*.

(c) Comparatives (*e*, however, is their predominant ending in the Ablative).

- (d) Participles in *-ns*.

If a Participial form is used as a Proper Name, it has *-e* only; e. g. *Clemens*, *Clemente*: if it is used as a substantive, it generally has *-e*.

In regard to Nouns substantive in *-is* (Gen. *-is*), which generally have the double form in the Ablative, no general rule, which will hold in all cases, can be laid down.

BR. 158-175. NEUE, *Lat. Forment.* I, 213-250.

#### 6. The Nominative Plural regularly ends in *-es*.

BR. 158. The secondary form in *-is* was not accepted by the old text-books. Only foreign names, especially Greek ones, allow *-is* in the Nominative Plural; e. g. *Sardis*, *Syrtis*, *Trallis*, *Alpis*. Cf. NEUE, *Lat. Forment.* I, 250-255.  
BR. 157.

7. In regard to the Accusative Plural, we quote the following rules from the Roman grammarians:

I. Words which have *-um* in the Genitive Plural have their Accusative in *-es*.

II. Words which have *-ium* in the Genitive Plural have their Accusative in *-es* and *is*; especially,

- (a) Words in *-is* which also have their Genitive Singu-

lar in *-is*, frequently form their Accusative Plural in *-is*; e. g. *navis, finis, omnis, dulcis*.

(b) Words in *-er* which have their Ablative Singular in *-i*, generally end in *-is* in the Accusative Plural; e. g. *acer, acris; imber, imbris* and *imubes; celer, celeris* rather than *celeres*.

(c) Words in *-ns* and *-rs* have *-es* and *-is*; e. g. *fontes* and *fontis*, Participle and Adjective in *-ns*, *inertes* and *inertis*.

(d) Words in *-as* generally have the Accusative Plural in *-es*, even when the Genitive ends, or may end, in *-ium*; e. g. *civitates*.

(e) Words in *-x* generally have *-es*; e. g. *arces, felices*.

Specially noteworthy are: *urbes* and *urbis*; *tres* and *tris*; *plures, complures*, and *pluris, compluris*.

BR. 149-158. Cf. KELLER on "The Accusative in *-is* of the Third Declension in the Augustan Poets," in the *Rhein. Museum*, XXI. 241-246. We do not find KELLER's delicate distinctions observed by the prose writers, while in the case of the poets they are deduced chiefly from Horatian MSS. The Vergilian MSS. present deviations from them (RIBBECK, *Prol. in Verg.* pp. 405-413); cf. with regard to Livy, MOMMSEN, *Transact. Berlin Acad.* 1868, p. 166.

### § 16. THE FOURTH DECLENSION.

The Dative and Ablative Plural have the ending *-ibus*; exceptions are: *arcubus, artubus, partubus, specubus* (secondary form, *specibus*?), *tribubus, verubus, vitubus* (secondary form, *vitibus*).

These forms are to be regarded as regular, although not the only ones in use. (BR. 112-118.)

## § 17. ADJECTIVES AND NUMERALS.

I. *The ending -imus.*

From the time of Cæsar on, the Superlative was formed in *-imus*, though the older form in *-umus* did not pass away at once. In imperial times, the latter form was no longer considered the standard one. We therefore write correctly, *optimus, maximus*, not *optumus*, etc.

BR. 107-112, 315, 321.

So the Ordinals, like *septimus, decimus, vicesimus*, etc., and Adjectives, like *finitimus, legitimus*, are not to be written with *u* in the penult.

BR. 108, 315, 321. See *decimus* in the alphabetical index.

II. *Numeral Adverbs.*

According to the rule laid down by the old grammarians, Numeral Adverbs, if formed from Cardinals, end in *-ies*; on the other hand, if they come from the Indefinite Numeral Adjectives *tot* and *quot*, they end in *-iens*. Thus: *quinquies, sexies, decies, centies, millies*, but *totiens, quotiens, multotiens*, etc.

This rule of the old grammarians was not, however, always followed, and cannot be absolutely binding for modern orthography. (BR. 268 *sq.*) Cf. NEUE, *Lat. Formenl.* II. 171-175.

## § 18. PRONOUNS.

I. *Hic, Haec, Hoc.*

I. The Nominative Plural Feminine is usually *hae*; there was likewise, up to the beginning of the Empire, a fuller form *haec*. Cf. 2 (below).

2. When *hic* assumes its full form, with the demonstrative *-ce*, we must write *hice*, *haece*, *hoce*, *huiusce*, *huice*, *hunce*, *hance*, *hoce*, *haice*, (Neuter Plural) *haece*. So at least in the texts of the Republic. These are the original forms, from which, after the third century B. C., arose by abbreviation the familiar Demonstrative Pronoun, *hic*, *haec*, *hoc*, *huic*, *hunc*, *hanc*. As the *-c* in this Pronoun is the remnant of the demonstrative *-ce*, this latter suffix cannot properly be added to it again. But the grammarians of the Empire, taking *hic* as a primitive, wrote incorrectly, *hicce*, *haece*, *hocce*.

RITSCHL, *Prooemium Indicis Lectionum* (Bonn. aest. 1852), p. V. Cf. NEUE, *Lat. Formenl.* II, 203–209, 211 *sq.* If the interrogative *-ne* is suffixed, there arises *hicine*, *haecline*, *hocine*; like *illicine* (*ille-ce-ne*), *isticine*, *nuncine* (*num-ce* = *nunc-ne*), *tuncine*, *sicine* (*si-ce* = *sic-ne*). (RITSCHL, *Opusc.* II, 556.) Cf. NEUE, l. c. 212.

## II. *Is, Ea, Id; Idem.*

The Plural of the Pronoun *Is* is declined, *ii, eorum, iis, eos, iis.*

BR. 323. Cf. 140 *sq.* The forms *ei* and *eis* in the Plural belong to the Republic, and disappear in the early days of the Empire.

The contracted Plural forms *idem* (= *iidem*) and *isdem* (= *iisdem*) were common.

BR. 141, 323. NEUE, *Lat. Formenl.* II, 198–202. Cf. Liv. III, 30, 1; 31, 2, *idem* = *iidem*; apd 57, 8; 68, 2; IV, 24, 5; XCI, p. 3, a., *isdem* = *iisdem* (*Codd. Veron., Pal.*). Often in inscriptions, *isdem consulibus*.

## § 19. VERBAL INFLECTIONS.

I. *The Third Person Plural of the Present Tense.*

Up to the time of Augustus, the Third Person Plural of the Present Tense, third Conjugation, ended in *-ont*, *-ontur*, after a preceding V. Afterwards, the ending *-unt* came into fashion, and we therefore write *vivunt*, *metuant*, *sequuntur*, *loquuntur*. See above, § 4, § 6, II.

On the other hand, we must write *locutus*, *secutus*, not *loquutus*, *sequutus*.

BR. 234 sq.

II. *Perfects in -vi and their Derivatives.*

The Perfect, Pluperfect, and Future Perfect in *-avi*, *-evi*, *-ovi*, as is known, lose the V in the forms which have an *-r*, *-st*, *-ss* in the ending, and the concurrent vowels are then contracted. Perfects in *-ivi*, and their derivatives, also lose the V frequently, and this too before all endings, yet without regularly contracting.

The following observations are to be specially noted in regard to the spelling :

- (a) The full forms are very commonly used in the First and Third Person Singular, and especially in the First Person Plural of the Perfect Indicative ; thus, *-ivi*, *-ivit*, *-ivimus*.
- (b) The dropping of the V is very common, if the ending has *-r* ; thus, *-ierunt*, *-ierim*, *-ieram*, *-iero*.
- (c) The two I's usually contract before *st* and *ss* ; thus, *-isti(s)*, *-isse*, *-issem* ; e. g. *audisti*, *audisse*, *audissem*.

**Exceptions :**

1. In Perfects in *-avi*, *-evi*, *-ovi*, the V is not regularly

dropped if it belongs to the stem. Yet *moveo* admits syncope.

2. Often in *peto* and *eo*, and regularly in compounds of *eo*, V is dropped in the First and Third Singular of the Perfect; thus *petii*, *petiit*, together with *petivi*, *petivit*; *ii*, *iit*, together with *ivi*, *ivit*. Compounds of *eo* regularly drop the V in all endings; e. g. *adii*, *adit*, *adiimus*, *adierunt*, *adieram*, *adierim*, *adiero*; and contraction frequently occurs before *st* and *ss*; e. g. *adisti(s)*, *adisse*, *adissem*.

3. *-ii* and *-iit* usually occur in *desino*; *desii*, *desiit*, also *desiimus* (contracted into *desimus*).

Numerous examples, showing in the MSS. a variation in these forms that can easily be explained, have been collected by NEUE, *Lat. Formenl.* II, 510-549.

### III. *The Future Passive Participle of the Third and Fourth Conjugations.*

The Future Passive Participle of these conjugations ends regularly in *-endus*. The older form *-undus* nevertheless occurs quite often in imperial times. If a V precedes, we must write *-endus* only; e. g. *metuendus*, *vivendus*, *sequendus*. On the contrary, if an I precedes, *-undus* frequently occurs; e. g. *faciundus*; this last form also predominates in certain legal formulae; regularly in *repetundarum*.

BR. 106 *sq.* NEUE presents examples, *Lat. Formenl.* II, 384-388.

### § 20. VERBAL COMPOUNDS.

#### I. *Verbs compounded with Prepositions.*

The grammars of the ancients lay down the rule that the final consonant of a Preposition must be assimilated

to the initial consonant of a Verb, whenever the nature of the colliding consonants allows of it. Before vowels, the Preposition changes only in few instances. The chief changes of the Prepositions are :

1. **ab** before vowels, before *i=j*, and *h, b, d, l, n, r, s*.  
*abs* before *c, q, t*; and  
*as* (with the dropping of *b*) before *p*; e. g. *asporto*.  
*a* before *f* in *afui* (see in the index **absum**), and before *m* and *v*.  
*au* before *f* in *aufero, aufugio*.

*ab* thus does not assimilate, and, in this way, confusion is avoided with the usually assimilated compounds of the Preposition *ad*.

2. **ad** before vowels, before *i=j*, and *h, b, d, f, m, n, q, v*.  
*ac* before *c*; e. g. *accipio*; not so well before *q*.  
*ag* and *ad* before *g*; e. g. *aggero, -are*, from *agger*; *adgerere*; *aggredior* and *adgredior*.  
*a* before *gn, sp, sc, st*; e. g. *agnosco, aspicio, aspiro, ascendo, asto*: *ad* may besides remain in full in these cases.  
*ad* and *al* before *l*.  
*ad*, better than *an*, before *n*.  
*ap* usually, more rarely *ad (p)*, before *p*.  
*ad* and *ar* before *r*.  
*ad* and *as* before *s*.  
*at* before *t*.

*d* also occurs before *t*; e. g. *adtraho*, Cic. Verr. II, 2, 1, § 1 (*Vat.*), and elsewhere.

3. **ante** becomes **anti** in *antistare, anticipare*. (BR. 180.)
4. **circum** may drop **m** before **eo, ire**: *circumeo, circueo*,

and commonly *circuitus*, *circuitio*, together with *circumitus*, *circumitio*.

e. g. Liv. IV, 56, 5, *circuisse* (*Veron.*), *circumisse* (*Med. saec. xi*, *Par. 5725, Leid. I.*). Concerning the old controversy whether *m* is to be retained, cf. **FORCELLINI**, s. v. *Cic. de Re p.* I, 29, 45 (*OSANN*). *OR.* (*Inscr. Lat. Coll.*), 6140.

5. **com** before *b*, *m*, *p*.

*con* before *c*, *d*, *f*, *g* (on *gn* see below), *i=j*, *n*, *q*, *s*, *t*, *v*.

*con* and *col* before *l*; the latter usually in *collegium*.  
*cor* before *r*.

*co* before vowels and *h* (except *comedo*, *comes*, *comitor*, *comitium*, *comitiare*). The initial vowel of the Verb may disappear owing to contraction;  
e. g. *cogo* (*co-ago*).

*co* before *gn*, and, after loss of *g*, before simple *n* in *conecto*, *coniveo*, *conitor*, *conubium*.

On *dis*, *di*, and *de*, see *derigo*, *dinosco*, *discribo*, and *dissigno* in the alphabetical index.

6. **ex** before vowels and *h*, *c*, *p*, *q*, *s*, *t*.

Except *epotus*, *epotare*. Cf. **NEUE, Lat. Formenl.** II, 766 sq.

*e* before *b*, *d*, *g*, *i=j*, *l*, *m*, *n*, *r*, *v*.

*ef* before *f*; e. g. *efferre*.

In Republican times (Cicero and Sallust), and, according to MSS., even in writers of the first century after Christ, there is also a weaker secondary form of *ex*, caused by the loss of the sibilant, viz.: *ec*; e. g. *ecfero*, *ecfatus*. Modern Latinists affect this form, but in any case *ecficere*, instead of the usual *efficere*, is to be avoided. Cf. **NEUE, Lat. Formenl.** II, 767 sq.

7. **in** before vowels, and *h*, *c*, *d*, *f*, *g* (except *gn*), *i=j*, *n*, *q*, *s*, *t*, *v*.

*in* and, more rarely, *il* before *l*.

*in* and *ir* before *r*.

*im* and *in* before *m*, *b*, *p*.

*im* is regular, but *in* occurs in reality very frequently.

Especially must we write **imperator**, not *impera-*  
*tor*, and *imperium* and *imperare* are preferable.

*i* before *gn*.

8. **ob** before vowels, before *i=j*, and *h*, *b*, *d*, *l*, *n*, *r*, *s*, *t*,  
*v*. *Op*, contrary to the theory of the grammarians  
 (above, § 7, I, 2), is frequently written before *s* and  
*t*. In *obsolesco*, the form of the Preposition *obs*  
 occurs.

*ob* and sometimes *om* before *m*.

*oc* before *c*.

*of* before *f*.

*og* before *g*.

*op* before *p*.

Contrary to the prevailing rule, *ob* also occurs before *p*: e. g.  
*obprobo*. In *omitto*, *operio*, *ostendo* (= *obs-tendo*), *b* is lost.

9. **per** remains regularly unchanged; only before *l* may  
*r* pass over into *l*; e. g. *pellego* = *perlego*, *pellicio* =  
*perlicio*; *r* may also fall out in derivatives of *ius*  
 and *iurare*. See *peiurus* and *peiero* in the alphabetical index.

10. **sub** before vowels, *h*, *i=j*, *b*, *d*, *l*, *n*, *s*, *t*, *v*.

*suc* before *c*.

*suf* before *f*.

*sug* before *g*.

*sum* and *sub* before *m*.

*sup* before *p*.

*subp* . . ., irregularly, occurs sometimes; e. g. *subpono*.

Cf. *adp.* . . ., *obp* . . .

*sur* and *sub* before *r*.

*sus* (from *subs*) in *suscipio*, *suscito*, *suspendo*, *sustineo*, *sustento*, (*sustollo*) *sustuli*.  
*su* in *suscipere*, *suspiro*.

11. *trans* before vowels, and *b*, *c*, *f*, *g*, *p*, *r*, *t*, *v*.  
*tran*, usually before *s*, and always before *sc*.  
*trans*, and frequently *tra*, before *i* = *i* and *j*, *d*, *l*, *m*, *n*.

BR. 294–303. With regard to Livy especially, cf. MOMMSEN, *Transact. Berlin Acad.* 1868, p. 170 *sq.*

## II. *Compounds of iacio with Prepositions of one Syllable.*

Compounds of *iacio* with Prepositions of one syllable should, after the change of *a* into *i*, be written with double *i*; e. g. *abiicio*. The theory of the Latin grammarians so required, but the forms with a single *i* largely predominated in actual usage.

We, therefore, are safest in writing :  
*abicio*, *adicio*, *inicio*, *obicio*, *subicio*.

If the Preposition ends in a vowel, *ii* may be written, and thus the detrition of the sound *ji* indicated; e. g. *coicio*, *deicio*. But even after a vowel, a single *i* is safer and better.

We write thus :  
*coicio*, *deicio*, *eicio*, *proicio*, *reicio*, *traicio*.

BR. 198–202. *NEUE, Lat. Formenl.* II, 734, 753 *sq.*, 766, and, in addition, *Liv. (Cod. Veron.)* III, 44, 6; 51, 12; IV, 12, 10; 13, 12; 21, 4; 58, 12.

## ORTHOGRAPHICAL INDEX,

ALPHABETICALLY ARRANGED.

### A.

**a, ab, abs**, Preposition.

**ab** stands before vowels and *h*; **a** generally before consonants. Before the consonants *b*, *f*, *p*, and *v*, **a** is usual, while **ab** is not rare before the remaining consonants, and especially frequent before *l*, *n*, *r*, *s*, and consonantal *i* (= *j*): e. g. *ab Iove* and *a Iove*.

**abs**, better than *aps*, can only be written before *te*, although even in this case *a te* is usual.

Examples in *NEUE, Lat. Formenl.* II, 737–747. The *Cod. Veronensis* now gives us more certain information as to *Livy*, who is fond of using *ab* before consonants; e. g. *ab iunioribus*, III, 65, 7: *ab legatis* and *a libidine*, *ib.* 26, 9; 44, 1: *ab suis* and *a se*, *ib.* 43, 6; 35, 2: *et a fronte et ab tergo*, IV, 33, 10: *ab Verginio*, *ib.* 21, 9: al.

*aps*, it is true, is warranted phonetically, and occurs; but it is not in accordance with the regular and generally received orthography; e. g. *aps te*, *Cod. Vat. Cic. Verrin.* II, 1, 43, § 111; *abs te*, *Cic. pro Rab.* 11, 30. See above, § 7, I. On the occurrence of *abs* elsewhere, see *NEUE, l. c.*

**a** and **ah**, Interjection.

Both forms are authenticated. Cf. NEUE, *Lat. Formenl.* II, 812 *sq.* E. g. Hor. Carm. I, 27, 18; II, 17, 5 (KELLER). Terent. Andr. III, 3, 11; Adelp. I, 2. 47 (UMPFENBACH).

**absens**, *v.* **absum**.

**aedes, aedis**. Nom. Sing. *aedis*, more rarely *aedes*; Accus. *aedem*; Abl. *aede*; Nom. Plur. *aedes*; Gen. *aedium*; Accus. *aedes* and *aedis*.

Charisius prescribes: "hae *aedes* = *domus*; sed *aedis* si *dixeris*, *templum significas*" (BR. 147 *sq.*).

The Nominative Sing. *aedis* is authenticated by a Cae-sarian inscription (BR. 147); by the *Fasti Praen. Ian. 27, Mart. 2, 19, April. 10, 28*; by the *Fast. Antiat. Aug. 18* (to which GARATONI, CORSEN, and others refer); and moreover in the 4th century by OR.-HENZ. 5580. Ms. examples are to be seen in NEUE, *Formenl. I*, 179 *sq.* Cf. *Cic. in Verr. II*, 4, 55 (§ 122 ZUMPT; JORDAN). The *Cod. Veron. Livii* has *aedis* once (IV, 25, 3), but *aedes* twice (III, 63, 7; V, 31, 3).

Accus. Plur.: *aedisque poplicas*, *Corp. Inscr. Lat. I*, 551 (2d cent. B. C.), and also in a Swiss inscription (4th cent. A. D.), MOMMSEN, *Inscr. Helv. 10*. Vergilian MSS. favor *aedes* (RIBBECK, *Index*, pp. 407, 412).

**aedus**, *v. haedus.*

**Aefula**, not **Aesula**.

*Hermes*, I, 426.

**Aegaeus**, *a*, *um*. *Alγaοs*.

So handed down in good MSS., along with aegeus,  
which is wrong. Cf. Hor. Carm. II, 16, 2; III, 29, 63;  
Epist. I, 11, 16. (KELLER-HOLDER.)

But on the other hand,

**Aegeae** and **Aegiae**, names of towns.

*Alγeai*: "Philippus Aegiis occisus est." Nepos de  
Reg. 2, 1. So FLECKEISEN, *Philol.* IV, 334. Aegeae,  
Justin. VII, 1, 10.

To be distinguished from these is the form *Alγeai*, the  
name of a town in Cilicia. Aegēas, Tac. Ařn. XIII, 8  
(egeas, *Codex*). In regard to these different names, cf.  
HENR. STEPHANI *Thes.* sub. *v. Alγai*, *Alγeia*.

**ăenēus**, **ăenus**, more frequently than the forms **ahe-**  
**neus**, **ahe**  
**neus**.

Both forms, with and without the *h*, are authenticated  
in Verg. Aen. II, 470, and Geor. I, 296. Cf. too the ob-  
servation of Gellius, II, 3. Yet the Vergilian MSS.  
have, according to RIBBECK (*Index*, p. 423), *aēneus*,  
"constanter exceptis Aen. I, 449 (*Med.* 2), et IV, 513  
(*Pierian.*)."  
Ms. tradition of Horace also favors both  
aeneus and aenus: vid. KELLER-HOLDER on Carm. I,  
33, 11; 35, 19; III, 3, 65; 9, 18; 16, 1; Serm. II, 3,  
183; Epist. I, 1, 60; II, 1, 248. (So the Vossian Ms.  
of Ausonius; Ausonii Ep. 25, 23.)

**Aequiculi and Aequicoli.**

Verg. *Aen.* VII, 747, gives *Aequicula* gens. *Corp. Inscr. Lat.* I, p. 564, *Elog.* 35, gives *aequeiculus*. Cf. *Liv.* I, 32, 5; X, 13, 1.

**Aequimaelium, not Aequimelium.**

*Aequimelium*, it is true, is given in the MSS., but that proves nothing, for they give *Melius* also repeatedly in place of the correct *Maelius* (so *Cod. Veron.* *Liv.* IV, 13, 1, *Melius*; but, IV, 13, 8, *Maelius*; cf. IV, 14, 1, 3. *Quintil.* V, 11, 12; 13, 24). The fact that *Varro*, *Cicero*, and *Livy* employ *Aequimaelium* in connection with the destruction of the house of *Maelius*, supports this form of the word. Cf. *DRAK.* on *Livy*, IV, 16, 1. *CHRIST* on *Cic. de Divin.* II, 17, 39 (ed. *Tur.* 2, IV, p. 534, 1). *BECKER*, *Röm. Alt.* I, 486.

decuma is the older form, used in the time of Cicero and Augustus (cf. *Corp. Ins. Lat.* I, p. 577. *Cod. Vatianus Verrinarum*, II, 3, 24, § 59. *Cod. Veron.* Livii, V, 23, 8). It also occurs in Quintilian's time (BR. 321). In Quintilian, however, VIII, 5, 19, we have the reading decimas.

**decimanus** and **decumanus**.

Like decima. The *Cod. Vat.* Verrin. often reads decumanus ; e. g. II, 2, 13, where the *Cod. Lagom.* 42, reads decimanus. Cf. decumates, Tac. Ger. 29.

**decimo**, -are, and **decumare**.

**designatio**, **designator**, **designo**, *v. design-*.

**desum**, **deest**, **deeram**, **deero**, not **dest**, **deram**, **dero**.

*dero* occurs, as is attested by (1) its being pronounced as a word of two syllables in the poets, (2) by the *Tabula Malacitana*\* (BR. 325), and elsewhere. MSS. examples of *dest*, *dero*, etc. are given by RITSCHL on *Suet. Vit. Terent.* p. 528, and by RIBBECK, *Prol. in Verg.* p. 414. But in writing, the correct form *deero* was also retained, independently of the pronunciation. Cf. the MS. readings of *Hor. **d e x t e r**, **d e x t e r a**, **d e x t e r u m**, and **d e x t r a**, **d e x t r u m**.

In prose of Quintilian's time, the syncopated forms dextra and dextrum are preferred. Older authors vary. It is to be observed, however, that dextera used as a substantive is of frequent occurrence. Plautus has only the full form (RITSCHL, *Opusc.* II, 673). The usage of individual authors is given by NEUE, *Lat. Formenl.* II, 5 - 7.

**epistula** (= *ἐπιστολή*), not **epistola**.

This is the undoubted spelling in inscriptions and old MSS. (FL. 17). The word has undergone the Latin umlaut of *o* into *u*. That Cicero must have written *epistola* is a false inference of CORSEN's, who has allowed himself to be misled by the Zurich edition of Cicero's Letters (1845). The older *Codex Mediceus* of the eleventh century, which alone can come into consideration in this matter, gives both forms, *epistula* and *epistola* (BAITER, *ed. Lips.* IX, p. vi. Cf. the titles of the "Books": *epistola 1, 2*; but, on the other hand, *epistula 3, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15, 16*). It follows from this that the late-Latin form *epistola* was not able to supplant, even in the comparatively recent *Codex Medi-*

*ceus*, the genuine form *epistula*, which is also well attested by inscriptions.

Cf. Sall. *Iug.* 71, 4, 5 (DIETSCH). MAI, *Auct. Class.* II, p. 389. RITSCHL, *Opusc.* II, 493, Rem.

On the other hand

**epistolicus** (= *ἐπιστολικός*) has remained a foreign word, while *epistula* became naturalized in the language.

**equus**, not *ecus* nor *equos*.

See above, § 6, II; § 14, I.

**era**, *v.* *erus*.

**ercisco**, *v.* *hercisco*.

**erus** ("the master of the house"), **era** ("the mistress of the house"), Adject. *erilis*, not *herus*, etc.

RITSCHL, *Opusc.* II, 409. This spelling is favored also by the readings in Hor. (*Carm.* II, 18, 32; III, 27, 63 — KELLER; cf. HOLDER, II, p. 404) and in Cic. (MAI, *Auct. Class.* I, p. 383). Eutyches as quoted in Cassiodor. p. 2313, 9, 19.

**Esquiliae**, **Esquilinus**, not **Exquiliae**, or **Aesquiliae**.

The form *Esqu-* is rendered certain by the names of the tribes in inscriptions, OR. 3091 (cf. *Fast. Consul.* ann. 304, *Corp. Ins. Lat.* I, p. 426; II, where we find *esquilinus*). The form *Exqu-* is founded on the grammatical theory in Varro (L. L., V, 49), and Verrius (cf. *Fast. Praen. Mart.* 2, which gives *exquiliis*. *Cod. Veron.*

Livii, III, 67, 11; 68, 2. MOMMSEN, *Transact. Berlin Acad.* 1868, p. 172).

Aesquil- [*Cod. Veron.* Livii, III, 66, 5, and Horatian MSS., Serm. I, 8, 14; II, 6, 33 (HOLDER). Cf. Epod. 5, 100; 17, 58 (KELLER)] is founded on the confusion of *ae* and *e* and on the derivation of *aesculus*. Cf. Varro, *l. c.* (MÜLLER).

**ex** before vowels and *h*; **e** and **ex** before consonants.

In many expressions, only one form of the Preposition is usual before consonants: e. g. *e re publica*, "for the

good of the state"; *e* *regione*, "opposite"; *e* *natura*, "according to nature"; and *extempore*, "instantaneously"; *ex sententia*, "according to one's wish"; *ex senatus consulto*; *ex lege*, and, if an adjective follows, *e* *lege* (for instance, *e* *lege Rupilia*); *ex parte*, "partly"; *ex professo*, "avowedly," "intentionally"; *ex Ponto*; *ex me* (*te, se*); *ex meo*, *tu*o; *ex and e* *suo*.

There is Ms. authority for both forms. Cf. *Cic. de Or.* III, 5, §17 (*exedra*, BAITER, ed. Tur., and ELLENDT); *de Fin.* V, 2, 4 (*exhedr-*, BAITER); *de Deor. Nat.* I, 6, 15 (*exedr-*, BAITER, ed. In *Vitruv.* V, 11, 2, ROSE-MÜLLER reads *exedra* twice, but the Mss. give sometimes one form, sometimes the other. *exsedra* occurs in *Or.* 3283.

Like *emo*. *Corp. Ins. Lat.* I, p. 579. *Cod. Veron.* Livii, V, 51, 4.

**existimatio**, better than **existumatio**.

**existumatio** is archaic, yet it occurs in Ciceronian MSS. E. g. *Cod. Vat.* Verrin. III, 83, 192. Cf. *aestumo*. **existumatio** is found in *Cod. Veron.* Livii, IV, 15, 1 BR. 5, 111. **existimo**, like **existimatio**.

**existumas**, along with **existimas**, in *Cic. de Deor. Nat.* II, 29, 73. **existimet**, in *de Re p. I*, 20, 23.

**Exquiliae**, **Exquelinus**, *v. Esquiliae*.

**ex-s-**, e. g. **exsanguis**, better than **exanguis**.

Both forms are correct, but the rule is, as laid down by the grammarians and sanctioned by frequent usage, that the *s* is to be retained in compounds made up of *ex* and a word commencing with *s*. Thus, *exsaevio*, *exscensio*, *exscindo*, *exscribo*, *exsculpo*, *exseco*, *exsecror*, *exsequiae*, *exsequor*, *exsicco*, *exsilio*, *exsilium*, *exsisto*, *exsolvo*, *exsonnis*, *exsors*, *exspecto*, *exspes*, *exspiro*, *exspolio*, *exspuo*, *exsterno*, *exstimo*, *extinguo*, *extirpo*, *exto*, *extruo*, *exsudo*, *exsul*, *exsulto*, *exsupero*, *exsurgo*, *exuscito*, etc., with their derivatives. **fetus, Substantive and Participle, not foetus.**

Stem like secundus. E. g. Hor. Carm. III, 27, 4; IV, 5, 27; Carm. Saec. 31 (KELLER).

**Forensia** and **Foresia**.

Foresia is Ciceronian (BR. 268).

**formica**, not **furmica**.

BR. 85.

**formidulosus**, better than **formidolosus**.

In Hor. Carm. II, 17, 18, Epod. 5, 55, KELLER writes  
**formidulosus**.

This is an old-Latin form: e. g. in Plaut. Ps. 824  
(RITSCHL), Terent. Eun. IV, 6, 18 (UMPFENBACH). Cf.  
Sallust, ed. DIETSCH, II, p. 220. But it is probable that  
later, **formidolosus**, perhaps in consequence of the simi-  
larity of sound with **formido**, became of frequent occur-  
rence also. Cf. Cic. in Verr. II, 5, 1, § 1. Cic. pro

Cluent. 3, 7; in Pis. 24, 58. Tac. Ann. I, 62, and other passages quoted in CORSEN'S *Ausspr.* II<sup>2</sup>, 145.

**formosus**, not **formonsus**.

The older form *formonsus* was dropped from the grammars in imperial times. (Br. 268; see above, § 9, III.) Cf. RIBBECK, *Prol. in Verg.* p. 434. RITSCHL, *Opusc.* II, 715.

**forsan**, **forsitan**, not - a m.

**frenum**, not **fraenum**.

According to settled and trustworthy tradition.

**frondosus**, like **formosus**.

**frons**, not **fros** nor **frus**.

RIBBECK, *Prol. in Verg.* p. 420.

That Pliny the Elder preferred **fros** is apparently a peculiarity of his (Br. 267).

**frustum**, not **frustrum**.

The recommendation to the contrary, laid down for our guidance, in the *Appendix Probi* (Br. 272), is based upon the incorrect spelling of MSS. Cf. RIBBECK, *Prol. in Verg.* p. 443. Hor. Serm. II, 6, 86 (HOLDER).

**furvus**, not the archaic form **forvus**.

KELLER on Hor. Carm. II, 13, 21.

Like *ausus*, *casus*, *causa* (Br. 275).

**genetivus**, not **genitivus**.

The weight of Ms. authority favors emphatically **genetivus** for the name of the case, as has already been observed by LACHMANN (*in Lucr.* p. 15 *sq.*). The proper name **Genitivos**, which CORSEN (II<sup>2</sup>, 297) cites (OR. 5749; 189 A. D.), has arisen from the well-known umlaut *e-i*, and can prove nothing for the name of the case. RIBBECK, *Prol. in Verg.* p. 420. Hor. ed. KELLER-HOLDER, II, pp. 411, 431.

In the time of Cicero, *natus*, as a Participle from *nascor*, was already of frequent occurrence (*Corp. Ins. Lat.*

The unaspirated form is supported by tradition. E. g. in Cic. *Tusc.* III, 31, 75. Nepos, *Lys.* 3, 5. Tac. *Ann.* IV, 55.

**halucinor**, *-ari*, *v.* **alucinor**.

Priscian considers nitus as regular, but allows nixus also in X, 48 (HERTZ, I, p. 537; cf. IX, 18, I, p. 461). Diomedes insists on nitus; "sed veteres (e. g. *Vergilius*) immutantes nixus declinant." He distinguishes between enitus, "to strive," and enixus, "to bear," "to bring forth" (as children, etc.). nixus, e. g. Cic. in Verr. II, 5, 33, § 86, = Quintil. IX, 4, 104. Verg. Aen. **obp-**, *v. oppeto*.

**obscenus**, better than **obscaenus**; not **obscoenus**.

The original form was *obscaenus*; it is derived from *ob(s)* and *caenum* ("filth"). But the weakening of *ae* into *e* occurred in *obscaenus* as in *caenum*, and in the former word this took place earlier and was more general (see *caenum*, above). *Rhein. Mus.* I, 445 (new series). Horatian MSS. invariably have *obscenus*. *Epod.* 5, 98; *Serm.* I, 2, 26; 8, 5; *Epist.* II, 1, 127 (KELLER-HOLDER). So, *Verg. **Quinctia**, **Quinctius**, must be written in the names that are familiar to us from the history of the Roman Republic; on the contrary, the family names familiar to us from the history of the Empire, have the more modern form **Quintia**, **Quintius**, along with the older **Quinct-**.

This rule is supported by Livian manuscript authority, for the old names are generally written by him with the *ct*, according to the *Codex Veronensis*, III, 12, 3, 8; 21, 8 al. IV, 8, 1; cf. on the contrary, III, 12, 2; 26, 9; 26, 11; IV, 7, 10; 17, 10. Examples of the *ct* are to be found in *Corp. Ins. Lat.* I, p. 592. The form **Quint-** arose in

**suspicio**, better than **suspitio**; the latter is probably an independent parallel formation from *suspic(i)atio*.

**suspitio** occurs in good MSS. along with **suspicio**, and since the length of the second syllable did not favor a direct derivation from **suspicor**, I formerly, with FLECK-EISEN and others, put down the form **suspitio** as alone correct (*Rhein. Mus.* xxiv, 539). Yet **suspicio** is so well attested from a time in which the confusion of *ci* and *ti* before vowels had not yet gained ground, that either **suspitio** is incorrect, or two independent formations have arisen; the first one direct from the *c*-stem **SPIC**, and the other from the supine stem **SPIC-T**. **Syria** and **Suria**.

Both forms belong to the first century of the Empire. The form with *y* came in after the Augustan age, but did not entirely displace the form with *u*. For modern Latin writing, **Syria** is to be recommended as the more correct form.

# HARPER'S NEW CLASSICAL LIBRARY.

The want of a Series of LITERAL TRANSLATIONS of the Greek and Latin authors who are usually studied in the American course of Academic, Classical, and Collegiate education has been long felt by the most intelligent and assiduous classical teachers. That they are capable of being abused by the indolent and unfaithful pupil is no plea against their utility when employed in their legitimate place. A translation of an ancient writer into English, as perfectly literal as is permitted by the idioms of the respective languages, affords an invaluable aid to the instructor in the accomplishment of his arduous task. If executed with fidelity and skill, it saves much time and labor in the consultation of dictionaries, and embodies the best results of philological acumen and research in the shortest possible space. Pages of learned commentary are thus concentrated in the rendering of a single word.

The works which have been issued are reprints from "BOHN'S CLASSICAL LIBRARY," brought out uniform with the English edition, and comprise faithful translations of the principal Greek and Latin Classics.

This NEW CLASSICAL LIBRARY has received a cordial welcome from the whole corps of American classical teachers. The important uses of such works in their daily vocations are too obvious to require discussion. Nor is the interest of the series confined to teachers alone. Every reading man, though destitute of a knowledge of the ancient languages, feels a laudable curiosity to form an acquaintance with the incomparable models of literary art which they have preserved. In the literal translations with which he is furnished by the present series he will find the information that he seeks, enabling him to comprehend current classical allusions with facility, to become familiar with the true spirit of the ancients, and to share in conversation and studies which presuppose a knowledge of Greek and Roman antiquity.
